

Mimecast for Outlook

Sent: Tuesday, January 2, 0001 12:00 AM

To all Tutor Perini Employees,

Tutor Perini IT is proud to present a brand new look and feel for your Mimecast email filtering experience, Mimecast for Outlook. Mimecast for Outlook allows you to gain access to your Mimecast services from inside Microsoft Outlook, by using the Mimecast ribbons. You can now interact with on hold messages, block email addresses or domains, or watch incoming email in Mimecast directly from Outlook without needing to sign into the website. Below is an overview of Mimecast for Outlook.

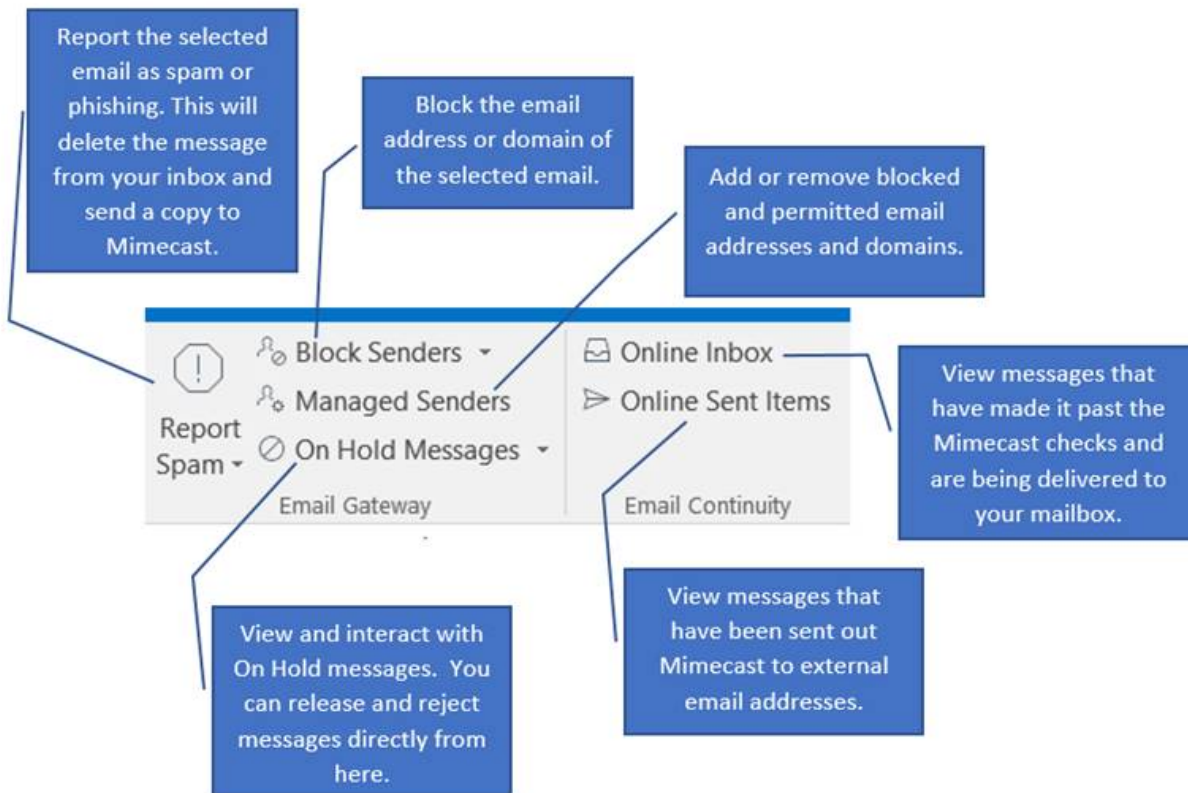

Managing Email with Mimecast for Outlook

What is Mimecast for Outlook?

Mimecast for Outlook is an application that allows you to manage your own email spam directly from Outlook. You can release email from on hold, block senders, or view incoming email in your Online Inbox

What Will Mimecast for Outlook Do for Me?

No more going to the <https://login.mimecast.com> page to manage your Mimecast spam. All of these functions, plus more, can be done directly from within Outlook. Below is what is capable within Outlook after installing the Mimecast client.

When Will I have Access to Mimecast for Outlook?

Mimecast for Outlook is available to everyone. Attached to this email are instructions for installing the client. If you experience any issues getting the application installed, please contact the IT helpdesk at helpdesk@tutorperini.com.

Thanks,
