

OVERVIEW

Citrix XenApp and XenDesktop are core elements of Tutor Perini's cloud computing strategy. Citrix allows remote access to applications hosted in the corporate network, without needing every one of those applications installed on your local device. With Citrix, you can access almost all of the company's applications via any web-enabled device, including: Apple iOS or Google Android phones/tablets and any PC with an internet connection and web browser.

PREREQUISITES

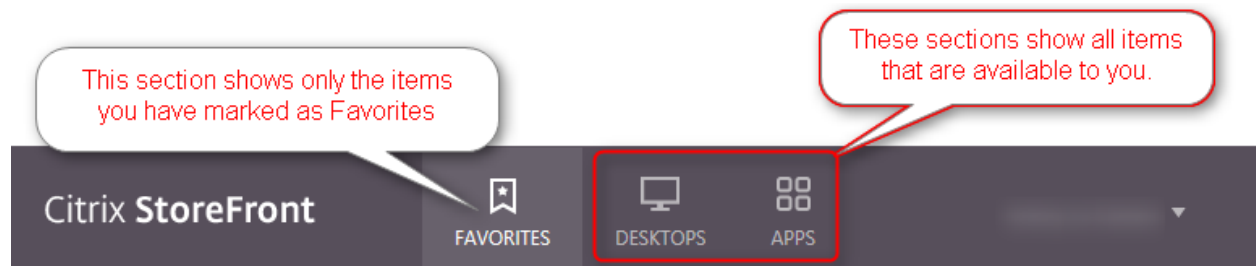

You must have Citrix Receiver installed on your device (contact the help desk as needed).

DETAILS

There are multiple ways to access Citrix:

1. Log in to <https://appstore.tutorperini.com> (do not use the old remoteapps.tutorperini.com).
or
2. Log in to **Citrix Receiver** on your computer/tablet/phone (screenshots below are a computer).

Citrix uses the same username and password as your company computer and e-mail account. After logging in, you will see the Citrix StoreFront interface with either 2 or 3 sections:

To launch an item, just click its icon.

To add an item as a Favorite, click the **Details** link next to the item, then click **Add to Favorites**.

To remove an item as a Favorite, click the **Details** link next to the item, then click **Remove**.
